

SAEVA Report
Eastern Cape
February 2019
Dr AH Parker

1. **Report Back**

There was an isolated case of AHS in the Woodridge area close to PE in October 2018.

2. **For Discussion**

Despite numerous phone calls and reminders, I am battling to get any of the private practitioners in the area to report on ECOD.

3. **For Decision-** None

4. **For Information**

The East Cape Horse Care Unit continues to visit the Transkei to do routine farrier work and present information on general primary health care, but due to budget constraints this has had to be curtailed.

The horse race due to take place at Fairview in December 2018 did not take place and is still planned.

5. **CPD-** None

6. **State Vet Liaison**

There is a good relationship and regular communication between the State Vet in Port Elizabeth and the private practitioners in the area.
