

## **SAEVA WELFARE REPORT - 14 February 2022**

### **REPORT BACK**

- Two 'Value Added' Equine-only days were organised and held at Highveld Horse Care Unit in June and August, order to allow scholars wanting to apply for Veterinary Science at Onderstepoort the chance to be exposed to equine work for a day. A wide variety of cases, including welfare cases, were presented and discussed. Basic horse handling skills were taught and practiced. 80 scholars were hosted over the two days.
- A full day of horse and donkey practical work was organised at the Highveld Horse Care Unit for veterinary students interested in equine work. 34 students attended and every student was able to do something on the day. The support from industry and the SAEVA was excellent and the students have requested that this Equine Skills Day be an annual event.

### **2. FOR DISCUSSION**

- Nothing specific to discuss

### **3. FOR DECISION**

- Nothing to decide upon
